WinTV 10 Download Manuals FAQ Gallery Videos Shortcuts WinTV v10 for the WinTV-unoHD Application Download If you do not have a WinTV v10 Activation Code, you can purchase a new WinTV v10 Activation Code on the Hauppauge website. If you have purchased an Activation Code for WinTV v10 with Extend from the Hauppauge Webstore, the latest version of WinTV v10 with Extend will be installed. Installation on multiple computers: the WinTV application can be installed on as many PCs as needed as long as you use the same Hauppauge device. We link the serial number of your TV tuner (sometimes it's the MAC address) with the Activation code. So as long as you use the same Hauppauge device, you can install the WinTV application on more than one computer. This download is a complete WinTV v10 application, including Windows drivers for supported WinTV products plus utilities. WinTV v10 installation instructions The WinTV v10 installer will install Windows drivers before installing the WinTV v10 application. It will also remove any pieces of a previous WinTV version before installing the new version. Step 1: Download the WinTV v10 installer by clicking the download button above. The WinTV v10 installer is normally saved in the Download folder on your PC Step 2: Run wintv10setup from the Download folder on your PC. If you see the message "Windows Protected Your PC, Windows Smartscreen prevented an unrecognized app ...", click 'More info' and 'Run anyway'. Windows Smartscreen is a new 'feature' in Windows 10 to prevent new updates from being installed automatically. Step 3: Halfway through the installation, a message will pop up asking for you to enter the Activation Code. Step 4: At the Activation required screen, click on Enter Activation code and enter the activation code which was emailed to you or is printed on the WinTV v10 activation card. You do not need to enter the dashes, and you can use upper or lower case characters. Step 5: When the installation is complete, you will find the WinTV icon on your Windows desktop. Double click on this icon and the WinTV application will run. On the first run of WinTV, it will automatically go through the TV source selection and will scan for channels. Click on the setting button (Gear) in the lower left of the WinTV v10 application. Then click on the Devices tab and highlight your WinTV device and click Tuner Setup (see the first picture below). In the Device Setup Wizard, you will see a list of TV formats which your Hauppauge TV tuner can support. Depending upon which Hauppauge tuner you have, you will have a choice of analog, digital or external inputs (see the second picture below). You can also select all formats and let the WinTV application show you what it finds in each format (if anything). Click Next and Next and let WinTV scan for channels. The results should look like picture 3 below. Settings -> Devices -> Tuner Setup click to enlarge Scan Complete click to enlarge Windows 10 Wake settings If recordings aren't happening at all, you need to make sure Wake Timers are enabled (see screenshot). You can find this setting in Power and sleep settings: Power Options -> Change Advanced Power Settings -> Sleep -> Allow wake timers: Control Panel\All Control Panel Items\Power Options>Edit Plan Settings On my PC it was set to "Important Wake Timers only" and the PC wouldn't wake up for recordings.
